

Arjun K B

Full-Stack Developer | JavaScript & TypeScript | Node.js | React

kbarjun2468@gmail.com | 9037660610 | Kerala | [linkedin.com/in/arjun-kb](https://www.linkedin.com/in/arjun-kb) | arjun-kb.vercel.app

PROFESSIONAL SUMMARY

Full-Stack Developer skilled in building scalable, maintainable **web applications** with **JavaScript** and **TypeScript**, focused on **backend** services and responsive frontends. Experienced delivering modular architectures, participating in **code reviews**, and supporting **CI/CD** and **Docker**-based workflows.

SKILLS

Languages: JavaScript, TypeScript, JavaScript ES6, HTML5, CSS3

Frontend: React.js, Next.js, Responsive UI, REST API Integration, Vue

Backend: Node.js, NestJS, Express.js, RESTful APIs

Tools & Practices: Git, GitHub, npm, Docker, CI/CD, Code reviews, Documentation

Databases: PostgreSQL, MySQL, MongoDB

Development: Full-Stack Development, API Development, Authentication, MVC Architecture, Reusable Components

Core Strengths: Problem Solving, Technical Analysis, Code Optimization, Evaluations, Evaluation strategies,

Model alignment, Communication skills

PROFESSIONAL EXPERIENCE

SAP ABAP Trainee, Cochin Shipyard Limited Feb 2026 - Present

- Developed and maintained SAP applications using ABAP, Open SQL, ALV and Smart Forms to automate vigilance clearance workflows and reduce manual processing steps
- Delivered custom reports and business functionality from technical and functional requirements, improving data visibility for stakeholders
- Diagnosed and resolved ABAP logic, database operations, authorization issues, and custom objects to restore application stability
- Designed structured, reusable ABAP solutions focused on maintainability and reliable data processing
- Applied systematic problem-solving and technical analysis to investigate application issues and improve existing functionality

Full-Stack Developer Trainee, Brototype Aug 2024 - Dec 2025

- Built full-stack **web applications** using **JavaScript**, **React**, **Node.js** and Express, implementing modular **frontend** components and API-driven backends to support CRUD workflows
- Designed and implemented REST APIs and integrated **frontend** applications with **backend** services and MongoDB to ensure consistent data flows and validation
- Implemented authentication, authorization, form validation and data management features, improving application security and user workflows
- Debugged and resolved **frontend**, **backend**, API, database, and application logic issues through systematic **testing** and participated in **code reviews** to improve **code readability** and stability
- Strengthened software engineering skills through hands-on development, **evaluations** of feature behavior, and collaboration with cross-functional teams

PROJECTS

ShopCraft · React, Redux, ToolKit, **Node.js**, Express.js, MongoDB, Rest API, **Docker**, **JavaScript** ⊕ [Project Link](#)

- Architected a microservices-based full-stack e-commerce platform with modular **backend** services and REST APIs to support core commerce workflows. Developed responsive **React frontend** and managed state with Redux Toolkit. Implemented MongoDB-driven workflows and containerized services with **Docker** to enable consistent **CI/CD** deployments.

DIYElectro — E-Commerce Platform · JavaScript, EJS, **Node.js**, Express.js, MongoDB ⊕ [Project Link](#)

- Delivered **frontend** components and user workflows for browsing and purchasing products, integrated **backend** APIs with Express and MongoDB for reliable data operations, and led cross-functional debugging to improve application functionality and **documentation**.

SAP Vigilance Clearance Management System · SAP, ABAP, ALV, S4 HANA, SAP Authorization, Custom Tables

- Built a custom SAP application for vigilance clearance workflows, implementing ABAP logic, validation, role-based functionality and ALV interfaces to streamline clearance processes and enforce authorization rules.

Medical Claim Report · SAP, ABAP, ALV, TABLES

- Implemented a reporting solution for medical claims with data retrieval, validation, processing and ALV-based report generation to produce structured, reliable business data for users.

EDUCATION

Diploma In Computer Engineering, Computer Engineering, Government Polytechnic Jun 2022 - Apr 2024 · Kerala College Kaduthuruthy
